specialists in the design and manufacture of temperature measuring equipment

New ThermaLite 2 Thermometer for Food Temperatures

The new ThermaLite 2 is a cost effective thermometer that is ideal for routine day-to-day food and catering applications. The thermometer indicates temperature over the range of -39.9 to 149.9 °C with a ± 0.5 °C accuracy. This accuracy is guaranteed for the life of the instrument, due to the advanced electronics.

Each ThermaLite thermometer incorporates a CalCheck 0 °C function which is activated by simply pressing the on/off and hold buttons simultaneously at the time of switching on. This function assures you that the instrument is always giving a correct reading.

The auto-power off facility turns the instrument off automatically after 10 minutes, maximising battery life. The instrument weighs just 45 grams and is housed in a high impact ABS case that includes Biomaster additive which reduces bacterial growth. The unit is available in six colours, helping to avoid cross-contamination, and can be part of your HACCP and due diligence procedures.

The ThermaLite 2, manufactured in Britain by ETI, is priced at £25 and includes a free traceable certificate of calibration, all prices exclude VAT and carriage. A protective silicone boot is also available at just £4 which makes the unit waterproof to IP65. For further information, visit www.etiltd.com or contact our sales office on 01903 202151.
